2.2.2 Publication Reference Date: 2019-02-20

### 2.3 Resource Description

2.3.1 Abstract: This dataset contains 403 gravity stations measured in the region of Eeklo, 1996. Data was acquired by the 'Centre Geophysique Interne', a collaboration between the Royal Observatory Belgium, the National Geographic Institute and the Geological Survey Belgium. The LaCoste-Romberg D#32 gravimeter was used; after processing, a MSE of 7.8  $\mu$ gal is achieved in this network.
